Mayo is the shipping point for the rich Keno Hill silver mining camp, which from present indications promises in course of development to rival the famous Cobalt mine, as some ore shipped from here the past year has run as high as 1000 oz. of silver to the ton and the average of all shipments has been over \$200 to the ton. In 1921 a few tons were shipped. In 1922 there were 2300 tons shipped, in 1923, 9800 tons, and 1924 the estimate of the present operators is in excess of 25000 tons.

At present there are upwards of five hundred silver locations taken up and new discoveries are constantly being made.

Mayo has three general stores, a drug store, two hotels, two restaurants, a saw mill in course of construction, electric lights and telephone service. A station of the Royal Canadian Mounted Police is located here.

Regular steamboat service is maintained by the White Pass & Yukon Route during the period of open navigation, and during the winter months a mail service is in operation by dog teams.

8. To co-operate with approved organizations and individuals engaged in creative advertising work.
9. To avoid unfair competition.
10. To determine what is the highest and largest function of directories and reference media in public service and then to strive in every legitimate way to promote that function.
