YOUR CHILD'S FUTURE... WITHOUT ELECTRICITY?

Our lives and those of our children would be very different without electricity. No lights, coffee makers or hot showers. What would the future hold for today's children if electricity was not available at a price they could afford?

Our electric supply is threatened by environmental groups making unreasonable demands on federal and state governments and on electric power systems. Unreasonable demands affecting the location of power plants, transmission lines, pollution equipment and coal mining, postpone the construction of necessary generating facilities and increase our cost of electric service drastically. Extended service delays and resulting expenses add to the ultimate cost of power supply systems. Eventually, these expenses are passed on to the consumer through higher electric bills.

The real impact of illogical environmental demands will be a dramatic increase in the cost of electric service for our children. If these activities continue unchecked, they will further hinder development and operation of power supply systems to the point of creating an even more critical shortage of electric energy. Responsible leaders in Kodiak, as well as state and federal officials, are aware of your concerns about the economic effects of regulation and further delays of the Terror Lake Hydroelectric Project on the packet book and the lifestyle of consumers for years to come.

Electricity is the strength of generations to come! Don't let costly regulations and delays price it out of their reach.

IMPORTANT DATES: 15th: Bills Due 20th: Discontinue Notices Every 4th Wednesday of the Month: Board of Directors Meeting 1st Monday of April: Annual Meeting

If you have plans to dig where there may be underground wiring or if you encounter trouble, or if you wish information about electrical service, please call us at 486-3261.
