

## BIA Census Records for the Village of Hooper Bay in the 1960s

These records are from the Bureau of Indian Affairs, not the decennial census. BIA records often have more personal information than the national census.

Sometimes a black mark ■ will show on my transcript. This is to indicate that a teacher wrote something on the census which was common knowledge in the village but the NARA (National Archives and Records Administration) took a Magic Marker to it because of relationship or medical issues.

The teachers often didn't know the spelling of Biblical and religious names. Without documentation I usually followed the unusual spellings.

Do not depend on my typing. Go to the original census records if you have a question. Reading records from an entire decade gives a better indication of the village.

Family tradition often disagrees with printed birth-dates. That is because

- 1) I may have typed them wrong
- 2) The teacher didn't hear the student
- 3) The student gave the new teacher a different date
- 4) No birth or baptism certificate was ever created.
- 5) "Just after the birds started flying" doesn't fit the form

I lived on the YK Delta for 45 years. I'm sharing this information for my village friends, both in the village and the big city.
